Dexian.com

Challenge

- Client had proprietary suite of clinical products and tools
- One of their customers sought to integrate the client's product suite into its own production pipeline
- Various functions needed to be customized and built within the software for the client's customer
- The client needed a partner to implement its software suite for its customer

Solution

- Dexian collaborated with both the client and its customer to gather and document all requirements for custom builds within the software suite
- Dexian used its extensive knowledge of the client's proprietary software to facilitate implementation of the software suite for the client's customer

Outcome

- Dexian was able to custom-build the software within the client's proprietary software suite to meet the end-customer needs
- We were instrumental in taking the product "live" for the client's customer and also offered post-implementation support
