Case Study: Transportation

Dexian Successfully Managed the Development of an Enterprise-wide Geographic Information System

@Dexian, LLC, 2023 | 4273401766

CLIENT:

An independent state agency responsible for financing, constructing, operating, and maintaining eight transportation facilities, currently consisting of two toll roads, two tunnels, and four bridges

Challenge

The client required a partner to provide Project Management Professional (PMP)-certified Project Management Office (PMO) Services

Solution

- Managed the development of an enterprise-wide Geographic Information Systems (GIS) including validation and testing
- Assisted the client's Technology PMO with the development and maintenance of project portfolio data for capital planning, internal management and reporting to executives
- Managed the upgrade of Primavera project management software for the Division of Engineering
- Developed Primavera project management process standards

Outcome

Implemented experienced managers and employees who were able to exceed the expectations of the company and provide realized benefits from the client that derived from our Project Management methodology
